Oct. 15 1927

Left Washington 10:20 PM.
for Pittsburgh,
Met by John B. Semple
and returned to Sandusky
Bay, Ohio to examine
Muskrat marshes

Oct. 17 over marshes.
of Winona Point Shooting
Club - near Port Clinton

Muskrats plentiful
but only $\frac{1}{4}$ what there
should be.

Think far too common.
about 2000 muskrats and
50 muskrats taken last winter,
a few even & no skunks.

Mouth of Bright Angles

Wild Fowl

How oft against the sunset sky a moon
I've watched the zigzag of spread wings
In unforgetten autumn gorges too soon
In unforgetten springs

Creatures of dissipation, far they fly
Above all lands bound by the curling foam
In misty fens, cold moors and tumbled sky
These wild things have their names.

They know the Tundra of Siberian Coast,
And tropic marshes by the Indian Seas
They know the clouds & mists & starry hosts
From Crux to Pleiades

Dark flying come against the western sky
It tells the sweep & loneliness of things
Symbol of Autumn vanished long ago,
Symbol of coming springs
Pa-Ta - Shun

To a Water Fowl Bygone

All day thy wings have fanned
At that far height, the cold thin atmosphere
Yet stoop not weary to the welcome land
Tho the dark night is near.

And soon thy toil shall end
Soon shalt thou find a secure home & nest
And lean among thy fellows
Reeds shall bend
Soon O'er thy sheltered nest.

He who from zone to zone
Guides through the boundless sky
Thy certain flight
In the long way that I must
Tread alone shalt lead
my steps aright.

Stories
